INDIVIDUAL

POLISHED STAINLESS STEEL

Refill packs part numbers and quantities are listed in price sheet.

Quantities will vary depending on item. Example: 3/8-16x1 Twelve Point = TC0610P, Refill pack (10pcs) = TC0610P-10

- Custom 450 Stainless
- 180,000 PSI Tensile
- 20% Stronger than Grade 8
- UNJ3A Rolled Threads

Diamond Engineering's Race Proof fasteners offer the ultimate in performance and looks. Cold headed from Custom 450 stainless then heat treated to 180,000psi (20% Stronger than GR8) these bolts can withstand almost anything. All threads are rolled to the UNJ3A specification which is the tightest tolerance as well as having a larger radius in the root of the thread. The bolts are then tumbled to insure a burr free and bright looking fastener. The final step is hand polishing the head to a perfect mirror finish giving you the Ultimate fastener whether used on the street or the track.

TWELVE POINT NUTS FINE

Manufactured from A286 stainless steel and rated at 180,000psi these Race Proof nuts are not only strong by they will not corrode. Whether you use these nuts for high temperature applications, environments where nitro methane is present or for building a custom bike these nuts will perform without failure.

| 1/2-20x5/8 | X1065P |

TWELVE POINT LOCKNUTS FINE

These aerospace nuts are the same ones used on Fighter Jets. The all metal locking design insures the nut will stay fastened and allows for repeated usage. The material is A286 stainless steel, which is rated at 180,000psi (20% stronger than GR8).

COUNTERSUNK WASHER

A Diamond Engineering original, designed for H-D rear fender rail so that all the bolt heads would match. Since then our customers have found many more applications from top fuel motor plates to air cleaner covers. We've expanded the sizes available so that now virtually anywhere you find a countersunk bolt and would like to replace it with another style for performance or appearance, you can!

INDIVIDUAL

POLISHED STAINLESS STEEL

Refill packs part numbers and quantities are listed in price sheet.

Quantities will vary depending on item. Example: 3/8-16x1 Twelve Point = TC0610P, Refill pack (10pcs) = TC0610P-10

- Custom 450 Stainless
- 180,000 PSI Tensile
- 20% Stronger than Grade 8
- MJ4g6g Rolled Threads

New for 2006 is the addition of Metric Race Proof fasteners. Rated at an impressive 180,000psi (20% Stronger than GR8) these bolts can withstand just about anything. They are manufactured from Custom 450 stainless, with the threads rolled after heat treating for increased strength. All fasteners are then tumbled to insure a burr free thread and give the fastener a bright finish. The final step is hand polishing the head to a perfect mirror finish giving you the ultimate in fastener technology and appearance.

TWELVE POINT NUTS METRIC

Diamond Engineering's Race Proof twelve point nuts are now available in metric too. Made to the same high standards, these nuts are perfect for custom bikes to Top Fuel. Manufactured from A286 stainless steel, rated at an impressive 180,000psi (20% stronger than GR8) they will not only perform but look great too.
